-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 June 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

1. Claim 16 is objected to because of the following informalities:

Re claim 16, the claim is not clear to the Examiner. For the purpose of the examination, the claim is interpreted to mean that other appliances will function as a server like the first appliance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102(e) that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 and 12-16 are rejected under 35 U.S.C. 102(e) as being unpatentable over Humpleman et al (U.S 6198479), hereinafter referred to as Humpleman.

Re claims 1, 9 and 10, Humpleman discloses providing an Internet service in a non-IP based network comprising a first server (*home device*, elements 102, 108 and 110, figure 14) connected to a non-IP based network (*home network*, column 4, lines 40-42) and

having an application program as installed and a second server (*Internet proxy*, element 1104, figure 14) connected to a non-IP network (*home network*) and an IP based network (*Internet*) and having the application program as installed so that a service corresponding to an Internet service request is provided to the Internet according to the Internet service request received from the Internet (column 20, lines 53-62).

Re claim 2, Humpleman discloses HAVi (Home Audio/Video interoperability) home network (column 4, lines 36-37).

Re claim 3, Humpleman discloses transmitting Internet service in a digital format or a Web document format (column 4, lines 15-19).

Re claim 4, Humpleman discloses accessing and controlling home devices through Internet service (*the Internet service is accessed from the Internet to the first and second server to control the first and the second servers*, column 20, lines 53-62).

Re claim 5, Humpleman discloses a layered interface model that can be used to for communicating between home devices and providing an Internet service through Internet proxy (figures 2 and 14).

Re claims 6 and 7, Humpleman discloses each home device containing interface data (column 4, lines 15-18).

Re claim 8, Humpleman discloses a layered interface model that can be used to for communicating between home devices and providing an Internet service through Internet proxy (figure 2).

Re claims 12 and 13, Humpleman discloses providing an Internet service in a non-IP based network comprising a first appliance (*Internet proxy*, element 1104, figure 14) for controlling and communicating the non-IP based network with the Internet (*home network*, column 4, lines 40-42) and a second appliance which is connected with the first appliance for providing the Internet service to an appliance connected with the Internet via the first appliance when the Internet service is requested by the appliance connected to the Internet via the first appliance (column 20, lines 53-62).

Re claims 14-16, Humpleman discloses each home network device functioning as a server for providing its own information (figure 3a; column 7, lines 13-15).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is are rejected under 35 U.S.C. 103(a) as being unpatentable over Humpleman in view of Gupta et al (U.S 5864542), hereinafter referred to as Gupta.

Re claim 11, Humpleman does not teach the server determining if the requested Internet service is a service to be provided by itself and not, then the server transmits an Internet

service start signal to the first server connected to the non-IP based network to provide the Internet service. However, Gupta discloses a system where the Data Access Server receives a command requesting specific information, and if the information is locally present, the server will retrieve the information and report to the requesting process. If the information is not locally available, the server determines where the information resides, and automatically establishes a logical connection to the information source. The server then invokes proper procedure, protocol, and messages to collect the information, and presents the data to the calling process in the same way it presents the local information (column 33, lines 4-13). It would have been obvious to one having ordinary skill in the art at the time the invention was made to implement relational database system of Gupta into Humpleman to provide requested services through a distributed network resources for multimedia application support.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - US Patent (5861906) to Dunn et al. discloses interactive entertainment network system and customizing operation according to viewer preferences
 - US Patent (6850149) to Park discloses network control system for home appliance
 - US Patent (6121593) to Mansbery et al. discloses home appliances controlled from a remote location

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hong Cho whose telephone number is 571-272-3087.

The examiner can normally be reached on Mon-Fri during 7 am to 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 571-273-3088.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
